Hillstone Primary School

Geography Policy 2022

Geography teaching is about developing an understanding of our world, through experience, investigation and research. Learning about the world we live in and our local area gives the children a sense of responsibility and understanding about the ways in which we can look after the world around us. At Hillstone Primary School, we provide regular opportunities for children to develop this understanding through fieldwork and practical activities. The children will learn about natural disasters which will allow them to understand how geography can affect the lives of people in various countries. International themes are an integral part of the curriculum at Hillstone and every opportunity is sought to ensure the children see how we fit into the world!

Aims and Objectives

Our aims and objectives of Geography teaching are to enable children to:

- ✚ Be able to discuss aspects of our local area including landmarks using correct Geographical vocabulary.
- ✚ Be able to use simple maps and globes to find different countries or to plot a simple route.
- ✚ To be able to compare the UK with other European and non-European countries.
- ✚ Take part in fieldwork and investigate the natural world around us.
- ✚ Understand how landscapes change over time and why.
- ✚ Develop an understanding of the natural world including natural disasters e.g. Earthquakes, Volcanoes and Tsunamis.
- ✚ To understand the water cycle and weather patterns in the UK.
- ✚ To gain an appreciation for other cultures and ways of life.
- ✚ To understand the need for sustainability and to contribute to this. E.g. Through recycling, eco-warriors etc.
- ✚ To understand global warming and the impact that this has on our world and the future of the planet.

Planning

At Hillstone Primary School all work is based around a half termly topic. Each topic incorporates a range of subjects which include science, history, geography, art, computing, DT and PE, as well as many opportunities to link literacy and numeracy. Targets should be taken from the curriculum and mapped out effectively on topic unit sheets. These should be the main focus for individual lessons within a Geography specific topic. Each year group will complete at least two topics which have a main geography focus each year.

Delivery

- ✚ The children should experience Geographical activities on a regular basis. This does not have to be limited to specific geography lessons- geographical skills and references can be used to support other curriculum lessons.
- ✚ Where possible Geography activities should be practical and allow children to learn outdoors.
- ✚ The geography curriculum will be taught through topics in a cross-curricular way.
- ✚ Both key stage one and key stage two children will be provided with the opportunity to undertake fieldwork that compliments their topics. This will include
 - Children planning for their fieldtrip e.g. Looking at maps and planning a route.
 - Observing landmarks and points of interest and recording findings in various ways including sketches/annotations and taking photographs.
 - Reflecting on what they found out while undertaking the fieldwork.
- ✚ Teachers should always consider and manage safety of the children when undertaking fieldwork. When appropriate teachers should visit the fieldwork site and complete a risk assessment if off site prior to taking the class.
- ✚ Topics are organised ensuring progress and breadth and build upon previously learnt skills.
- ✚ Teachers to ensure that Geography teaching is in line with the Geography targets that have been mapped out for relevant topics.

Early Years

We teach Geography in Nursery and Reception classes as an integral part of the topic work covered during the year. Geography is encompassed in the early year's curriculum within 'Understanding of the World'. Nursery and Reception both use the early year's objectives to ensure that Geography is included in planning and suitable activities are planned for. Geography and outdoor learning is a crucial element of a child's development. Children in foundation stage have access to the outdoors daily and are encouraged to explore the world and natural interests around them. Fieldwork activities are planned in Reception and allow the children to gain a better understanding of the world. By the end of Reception children will be able to use some geographical vocabulary and talk about aspects of their familiar world.

Record Keeping, Assessment and Reporting

As in all other areas of the curriculum, assessment is an integral part of the teaching process. Children's Geography work can be evidenced in a number of ways. This will include work in books. When appropriate class teachers should make recordings of the pupils practical work (using iPads, cameras etc.). In addition, photographs can be used to evidence practical or fieldwork.

Progress will be recorded at the end of the half term when a specific Geography topic has been taught.

At the end of the topic the teacher will record their teaching judgement on Balance for each child.

✚ 1 - 3 if the child has shown limited understanding of the taught targets.

✚ 4 – 6 if the child has made some progress and shown some understanding of targets taught.

- ✚ 7 – 9 if the child has shown progress and understanding in most targets but is not confident when demonstrating this independently or when reviewed following a lesson.
- ✚ 10 (secured) if the child has secured all targets and demonstrated a good understanding during the topic.

Additional Opportunities for Children

All children at Hillstone Primary school will have the opportunity to take part in a residential trip. These trips will enhance geographical skills by allowing the children to use taught skills in a real context for example; orienteering or following a route on a map.

During Geography topics the children will explore the local area as well as Birmingham city centre and London. This will give them a greater understanding of place knowledge and also will enable them to compare locations. Through International links children will also have the opportunity to talk to children in other parts of the world via video calls, emails and written letters, and compare with them the country they live in, education, housing and weather.

Early years children will have the opportunity to take learning outdoors to complete forest school activities. This will help to establish a love of the outdoors and learning about the natural world.

A nature club will be offered to Reception/Yr1 children during the summer term. This will focus on objects that are found in the natural world.

We teach geography to all children, whatever their ability, in accordance with the school curriculum policy of providing a broad and balanced education to all children.

Monitoring and review

The Geography subject leader is responsible for ensuring the standard of children's work and for the quality of teaching in Geography. The work of the subject leader also involves supporting colleagues in the teaching of Geography and being informed about current developments in the subject. This will then be used to build upon current topic planning. The Geography subject leader is responsible for giving the head teacher an annual summary report in which she evaluates the strengths and weaknesses in the subject and indicates areas for further improvement.
