

Year 1 Fins, Feathers and Feet

This is one of our science projects. We will be learning all about how to group and sort animals by what they eat and what they look like.

Prior Learning

Nursery	The life cycle of a frog.
Reception	The life cycle of a butterfly.
Reception	Animals that eat meat, grass or both.

Vocabulary

Carnivores
Herbivores
Omnivores
Scales
Fins
Cold-blooded
Warm-blooded

Key Questions

What do birds, fish and reptiles have in common?

What do animals need to survive?

Can you name the young of 5 farm animals?

Mammal: Mammals usually have hair or fur and are warm-blooded.

Bird: Birds have wings, feathers and beaks and are warm-blooded.

Fish: Fish breathe underwater using gills and are cold-blooded. They have fins and scales.

Reptile: Reptiles have scales and are cold-blooded. They cannot breathe underwater.

Amphibians: Amphibians live on land and water. They can breathe underwater through gills and are cold-blooded.
